**Game programmer with experience in game development, virtual reality, and software engineering.**

## Summary:

Programmer, researcher, and student passionate about games, virtual reality, and entertainment who is eager to build the future of real-time interactive digital experiences. Previous experience in game development, VR, research, and software engineering in both small-team and corporate environments.

## Experience:

**Tools Programmer Intern, Epic Games, Virtual Production Tools** - June 2020-Sept 2020 - [unrealengine.com](https://unrealengine.com)

Engineering new virtual production tools for Unreal Engine 4 as an intern on the Virtual Production Tools team in order to enable the future of virtual production filmmaking workflows in UE4. Skills: Unreal Engine 4, C++.

**Research Programmer Intern, Epic Games, Research** - June 2020-Sept 2020 - [unrealengine.com](https://unrealengine.com)

Created deep reinforcement learning samples in Unreal Engine 4 and guided the development of a plugin to facilitate the use of UE4 for AI and ML applications. Skills: Unreal Engine 4, C++, research, reinforcement learning, Python, PyTorch.

**VRITS Programmer, Virtual Human Interaction Lab** - Sept 2019-Sept 2020 - [vhil.stanford.edu](https://vhil.stanford.edu)

Built VR experiences as a Virtual Reality Intensive Training Seminar (VRITS) programmer at Stanford University's Virtual Human Interaction Lab (VHIL) that are actively used in research, demos, and tours. Skills: Unity, C#, UE4, C++, virtual reality, Blender.

**Google Engineering Practicum Intern, Google Cloud Platform** - June 2019-Sept 2019 - [github.com/knative-portability](https://github.com/knative-portability)

Developed several full-stack [open-source applications](#) as proof of portability for [Knative](#), an open-source platform for serverless containerized workloads. Skills: Python, Flask, MongoDB, CI/CD, testing, OAuth 2.0, Node.js, Express.js, TypeScript, PostgreSQL.

## Selected Projects:

**Rogue Starfighter VR - Personal Project** - Feb 2020-Mar 2020 - [gameplay video](#) - [github.com/mukobi/Rogue-Starfighter-VR](https://github.com/mukobi/Rogue-Starfighter-VR)

Rogue Starfighter VR is a virtual reality Star Wars X-wing flight simulator fan-game. In it, the player experiences the full scale and power of the space combat from a galaxy far, far, away behind the controls of a fully-interactive T-65B X-wing starfighter.

**Virtual Becomes Reality - Virtual Human Interaction Lab** - Dec 2019-Aug 2020 - [project page](#)

Virtual Becomes Reality combines the Virtual Human Interaction Lab's many lab tour demos and research findings into a self-contained VR experience. As one of more than a dozen people involved with the project, I developed a multitude of gameplay features and earned 1 of 2 Senior Programmer credits.

**UnSoundBoard - Personal Project** - August 2020 - [github.com/mukobi/UnSoundBoard](https://github.com/mukobi/UnSoundBoard)

I play Dungeons and Dragons online with friends, and I wanted a soundboard to play sounds through a virtual microphone over Zoom. Unfortunately, I didn't like any of the free soundboards available, so I built my own in Unreal Engine 4 with personalized features.

## Skills:

**Game Development** - Unreal Engine, Unity, gameplay programming, virtual reality, Blender, 3D modelling, computer graphics, DirectX, OpenGL, technical art. Languages: C++, C#, Python. - [software.gabrielmukobi.com/games](https://software.gabrielmukobi.com/games)

**Software Engineering** - design principles, agile development, product management, documentation, unit testing, bug reporting, code review, data structures, algorithms, CI/CD, debugging, IDEs, command line, Linux, Git, Perforce, [GitHub](#), [GitLab](#). Languages: C++, C#, C, Python, Java. - [software.gabrielmukobi.com](https://software.gabrielmukobi.com)

**Artificial Intelligence** - machine learning, deep learning, reinforcement learning, Bayesian networks, logic, research, PyTorch, TensorFlow, Keras. Languages: Python.

**Web Development** - full-stack, web design, databases. Languages: JavaScript, Node.js, Python. - [software.gabrielmukobi.com/web](https://software.gabrielmukobi.com/web)

## Education:

**Stanford University** - B.S. Computer Science - Sept 2018-June 2023 (rising third-year student on a gap year) - Cumulative GPA: 3.97

Coursework in: Computer Graphics, AI, HCI, Algorithms, Data Structures, Probability, Computer Systems, Linear Algebra.

## Interests:

[Photography](#), [digital 3D art](#), [filmmaking](#), [music performance](#), video and tabletop gaming, fantasy, and science-fiction.
